Projects

OPEN SOUND

https://github.com/morenogomes/project_2 | <https://stark-woodland-75959.herokuapp.com/>

- Created an alternative to Spotify where the user is able to create playlists, add artists and albums to their account for easy access.
- Main responsibility included OAuth token authentication in order to generate the music to be able to play in the application.

EAT-DA-BURGER!

https://github.com/morenogomes/project_2 | <https://stark-woodland-75959.herokuapp.com/>

- Created a burger logger using MVC design pattern that allows users to input the name of a burger and toggle between devouring and deleting the burger.

Experience

FRONT- END DEVELOPER | TORONTO TECH MENTORING | SEPTEMBER 2020 – PRESENT

<https://github.com/Toronto-Tech-Mentoring/TTM-Website> | <https://torontotechmentoring.netlify.app/>

- Designed different sections of the website as per Figma provided by the design team.
- Reviewed other team members code and provided feedback to improve design and workflow.
